**Re-Investing Authenticity** Britta Timm Knudsen, Anne Marit Waade, 2010-01-22 From the highly influential concept of 'staged authenticity' discussed by Dean MacCannell, to the general claim of longing for authenticity on behalf of all Western consumers, made by Joseph Pine and James Gilmore, it is obvious that the concept of authenticity is still worth considering. This ground-breaking book re-thinks and re-invests in the notion of authenticity as a surplus of experiential meaning and feeling that derives from what we do at / in places. In *Re-investing Authenticity - Tourism, Place and Emotions* international scholars representing a wide range of disciplines, examine contemporary performances of authenticity in travel and tourism practices: From cultural place branding to individual pilgrim performances; from intensified experiences of imaginary crime scenes to the rhetorical features of the encounter with the traumatic and; from photography performing memories of place to experiences of wilderness producing excitement, this book demonstrates how the feeling of authenticity within places is produced.

*Reading Images* Gunther R. Kress, Theo Van Leeuwen, Theo van Leeuwen, 1996 *Reading Images* provides the first systematic and comprehensive account of the grammar of visual design. By looking at the formal elements and structures of design the authors examine the ways in which images communicate meaning.

The Cambridge Handbook of Applied Perception Research Robert R. Hoffman, Peter A. Hancock, Mark W. Scerbo, Raja Parasuraman, James L. Szalma, 2015-01-26 *The Cambridge Handbook of Applied Perception Research* covers core areas of research in perception with an emphasis on its application to real-world environments. Topics include multisensory processing of information, time perception, sustained attention, and signal detection, as well as pedagogical issues surrounding the training of applied perception researchers. In addition to familiar topics, such as perceptual learning, the Handbook focuses on emerging areas of importance, such as human-robot coordination, haptic interfaces, and issues facing societies in the twenty-first century (such as terrorism and threat detection, medical errors, and the broader implications of automation). Organized into sections representing major areas of theoretical and practical importance for the application of perception psychology to human performance and the design and operation of human-technology interdependence, it also addresses the challenges to basic research, including the problem of quantifying information, defining cognitive resources,

and theoretical advances in the nature of attention and perceptual processes.

**Novel Prospects in Oxidative and Nitrosative Stress** Pinar Atukeren, 2018-05-09 Oxidative stress plays a crucial role in the pathophysiology of various diseases when there is a disruption of the intracellular redox balance and the homeostatic balance between cellular oxidants and antioxidants. Reactive oxygen species (ROS) and reactive nitrogen species (RNS) react with molecular targets including proteins, lipids, and nucleic acids contributing to mitochondrial injury and cellular dysfunction. This book intends to provide the readers with an extensive overview of the novel approaches and prospects based on oxidative and nitrosative stress in the pathophysiology of various diseases and in the current treatment strategies with antioxidants.

**Systemic Functional Linguistics** Lise Fontaine, Tom Bartlett, Gerard O'Grady, 2013-12-19 This stimulating volume provides fresh perspectives on choice, a key notion in systemic functional linguistics. Bringing together a global team of well-established and up-and-coming systemic functional linguists, it shows how the different senses of choice as process and as product are interdependent, and how they operate at all levels of language. Taking an interdisciplinary approach, it covers a range of linguistic viewpoints, informed by evolutionary theory, psychology, sociology and neuroscience, to produce a complex but unifying account of the issues. This book offers a critical examination of choice and is ideal for students and researchers working in all areas of functional linguistics as well as cognitive linguistics, second-language acquisition, neurolinguistics and sociolinguistics.

**Translating Film Subtitles into Chinese** Yuping Chen, 2019-02-01 This book examines three metafunction meanings in subtitle translation with three research foci, i.e., the main types of cross-modal interrelation, the primary function of semiotic interplay, and the key linguistic components influencing the subtitles. It goes beyond traditional textual analysis in translation studies; approaches subtitle translation from a multimodality standpoint; and breaks through the linguistic restraints on subtitling research by underscoring the role of semiotic interplay. In the field of multimodality, this book bridges subtitling and multimodality by investigating the interweaving relationships between different semiotic modes, and their corresponding impacts on subtitle translation.

**Exploring Digital Design** Ina Wagner, Tone Bratteteig, Dagny Stuedahl, 2010-08-12 Exploring Digital Design takes a multi-disciplinary look at digital design research where digital design is embedded in a larger socio-cultural context. Working from socio-technical research areas such as Participatory Design (PD), Computer Supported Cooperative Work (CSCW) and Human-Computer Interaction (HCI), the book explores how humanities offer new insights into digital design, and discusses a variety of digital design research practices, methods, and theoretical approaches spanning established disciplinary borders. The aim of the book is to explore the diversity of contemporary digital design practices in which commonly shared aspects are interpreted and integrated into different disciplinary and interdisciplinary conversations. It is the conversations and

explorations with humanities that further distinguish this book within digital design research. Illustrated with real examples from digital design research practices from a variety of research projects and from a broad range of contexts Exploring Digital Design offers a basis for understanding the disciplinary roots as well as the interdisciplinary dialogues in digital design research, providing theoretical, empirical, and methodological sources for understanding digital design research. The first half of the book Exploring Digital Design is authored as a multi-disciplinary approach to digital design research, and represents novel perspectives and analyses in this research. The contributors are Gunnar Liestøl, Andrew Morrison and Christina Mörtberg in addition to the editors. Although primarily written for researchers and graduate students, digital design practitioners will also find the book useful. Overall, Exploring Digital Design provides an excellent introduction to, and resource for, research into digital design.

**The Prokaryotes** Edward F. DeLong, Stephen Lory, Erko Stackebrandt, Fabiano Thompson, 2014-10-13 The Prokaryotes is a comprehensive, multi-authored, peer reviewed reference work on Bacteria and Archaea. This fourth edition of The Prokaryotes is organized to cover all taxonomic diversity, using the family level to delineate chapters. Different from other resources, this new Springer product includes not only taxonomy, but also prokaryotic biology and technology of taxa in a broad context. Technological aspects highlight the usefulness of prokaryotes in processes and products, including biocontrol agents and as genetics tools. The content of the expanded fourth edition is divided into two parts: Part 1 contains review chapters dealing with the most important general concepts in molecular, applied and general prokaryote biology; Part 2 describes the known properties of specific taxonomic groups. Two completely new sections have been added to Part 1: bacterial communities and human bacteriology. The bacterial communities section reflects the growing realization that studies on pure cultures of bacteria have led to an incomplete picture of the microbial world for two fundamental reasons: the vast majority of bacteria in soil, water and associated with biological tissues are currently not culturable, and that an understanding of microbial ecology requires knowledge on how different bacterial species interact with each other in their natural environment. The new section on human microbiology deals with bacteria associated with healthy humans and bacterial pathogenesis. Each of the major human diseases caused by bacteria is reviewed, from identifying the pathogens by classical clinical and non-culturing techniques to the biochemical mechanisms of the disease process. The 4th edition of The Prokaryotes is the most complete resource on the biology of prokaryotes. The following volumes are published consecutively within the 4th Edition: Prokaryotic Biology and Symbiotic Associations Prokaryotic Communities and Ecophysiology Prokaryotic Physiology and Biochemistry Applied Bacteriology and Biotechnology Human Microbiology Actinobacteria Firmicutes Alphaproteobacteria and Betaproteobacteria Gammaproteobacteria Deltaproteobacteria and Epsilonproteobacteria Other Major Lineages of Bacteria and the Archaea

**Learning Cities** Sue Nichols, Stephen Dobson, 2018-03-29 This book is an interdisciplinary text exploring the learning

and educative potentials of cities and their spaces, including urban and suburban contexts, at all stages of life. Drawing on the insights of researchers from diverse fields, such as education, architecture, history, visual sociology, applied linguistics and sensory studies, this collection of papers develops and demonstrates the connection between experience, in all its dimensions, and informal learning in the city. The chapters discuss various sensory domains of experience, considering visual, embodied, and even sexual dimensions in relation to what and how learning operates, and the contributors reflect on their learning and inquiring experiences in the city, with special reference to topics such as narrativity, 'race' and ethnicity, equity, urban literacy, re-generation, participation, representation and oral histories.

**Drought Stress Tolerance in Plants, Vol 2** Mohammad Anwar Hossain, Shabir Hussain Wani, Soumen Bhattacharjee, David J Burritt, Lam-Son Phan Tran, 2016-08-24 Drought is one of the most severe constraints to crop productivity worldwide, and thus it has become a major concern for global food security. Due to an increasing world population, droughts could lead to serious food shortages by 2050. The situation may worsen due to predicated climatic changes that may increase the frequency, duration and severity of droughts. Hence, there is an urgent need to improve our understanding of the complex mechanisms associated with drought tolerance and to develop modern crop varieties that are more resilient to drought. Identification of the genes responsible for drought tolerance in plants will contribute to our understanding of the molecular mechanisms that could enable crop plants to respond to drought. The discovery of novel drought related genes, the analysis of their expression patterns in response to drought, and determination of the functions these genes play in drought adaptation will provide a base to develop effective strategies to enhance the drought tolerance of crop plants. Plant breeding efforts to increase crop yields in dry environments have been slow to date mainly due to our poor understanding of the molecular and genetic mechanisms involved in how plants respond to drought. In addition, when it comes to combining favourable alleles, there are practical obstacles to developing superior high yielding genotypes fit for drought prone environments. Drought Tolerance in Plants, Vol 2: Molecular and Genetic Perspectives combines novel topical findings, regarding the major molecular and genetic events associated with drought tolerance, with contemporary crop improvement approaches. This volume is unique as it makes available for its readers not only extensive reports of existing facts and data, but also practical knowledge and overviews of state-of-the-art technologies, across the biological fields, from plant breeding using classical and molecular genetic information, to the modern omic technologies, that are now being used in drought tolerance research to breed drought-related traits into modern crop varieties. This book is useful for teachers and researchers in the fields of plant breeding, molecular biology and biotechnology.

**Integrated Gasification Combined Cycle (IGCC) Technologies** Ting Wang, Gary J. Stiegel, 2016-11-26 Integrated Gasification Combined Cycle (IGCC) Technologies discusses this innovative power generation technology that combines modern coal gasification technology with both gas turbine and steam turbine power generation, an important emerging

technology which has the potential to significantly improve the efficiencies and emissions of coal power plants. The advantages of this technology over conventional pulverized coal power plants include fuel flexibility, greater efficiencies, and very low pollutant emissions. The book reviews the current status and future developments of key technologies involved in IGCC plants and how they can be integrated to maximize efficiency and reduce the cost of electricity generation in a carbon-constrained world. The first part of this book introduces the principles of IGCC systems and the fuel types for use in IGCC systems. The second part covers syngas production within IGCC systems. The third part looks at syngas cleaning, the separation of CO<sub>2</sub> and hydrogen enrichment, with final sections describing the gas turbine combined cycle and presenting several case studies of existing IGCC plants. Provides an in-depth, multi-contributor overview of integrated gasification combined cycle technologies Reviews the current status and future developments of key technologies involved in IGCC plants Provides several case studies of existing IGCC plants around the world

*Designing Data-Intensive Applications* Martin Kleppmann, 2017-03-16 Data is at the center of many challenges in system design today. Difficult issues need to be figured out, such as scalability, consistency, reliability, efficiency, and maintainability. In addition, we have an overwhelming variety of tools, including relational databases, NoSQL datastores, stream or batch processors, and message brokers. What are the right choices for your application? How do you make sense of all these buzzwords? In this practical and comprehensive guide, author Martin Kleppmann helps you navigate this diverse landscape by examining the pros and cons of various technologies for processing and storing data. Software keeps changing, but the fundamental principles remain the same. With this book, software engineers and architects will learn how to apply those ideas in practice, and how to make full use of data in modern applications. Peer under the hood of the systems you already use, and learn how to use and operate them more effectively Make informed decisions by identifying the strengths and weaknesses of different tools Navigate the trade-offs around consistency, scalability, fault tolerance, and complexity Understand the distributed systems research upon which modern databases are built Peek behind the scenes of major online services, and learn from their architectures

**Restaurant Chains in China** Guojun Zeng, Henk J. de Vries, Frank M. Go, 2018-10-12 This book explores the paradox of the hospitality industry: customers demand not only personal and innovative tourism products and services, but also cost-effective ones. Enterprises have the option to meet the former demand by offering authentic products and services while the latter could be achieved through standardization. Although it seems ideal to combine both concepts, they seemingly contradict each other leading to suppliers facing an authenticity-standardization paradox. The authors identify, analyze, and provide solutions for this authenticity-standardization paradox based on a series of case studies of restaurants in China. This book will be of interest to scholars, business owners, and consultants.

*Data Visualization in Society* Martin Engeström, Helen Kennedy, 2020-03-21 Today we are witnessing an increased use

of data visualization in society. Across domains such as work, education and the news, various forms of graphs, charts and maps are used to explain, convince and tell stories. In an era in which more and more data are produced and circulated digitally, and digital tools make visualization production increasingly accessible, it is important to study the conditions under which such visual texts are generated, disseminated and thought to be of societal benefit. This book is a contribution to the multi-disciplined and multi-faceted conversation concerning the forms, uses and roles of data visualization in society. Do data visualizations do 'good' or 'bad'? Do they promote understanding and engagement, or do they do ideological work, privileging certain views of the world over others? The contributions in the book engage with these core questions from a range of disciplinary perspectives.

*Salicylic Acid: A Multifaceted Hormone* Rahat Nazar, Noushina Iqbal, Nafees A. Khan, 2017-11-20 This book provides an overview of current knowledge, ideas and trends in the field of induced acclimation of plants to environmental challenges. Presenting recent advances in our understanding of the importance of salicylic acid, it paves the way for deciphering the precise role of salicylic acid in the field of plant physiology, biochemistry and agronomy, and breeding stress-tolerant and high-yielding sustainable transgenic crops. Adopting a mechanistic approach, the book offers valuable information on the role of salicylic acid in combating varied abiotic stresses. Plants are challenged by biotic and abiotic stresses. They adjust to changing environmental conditions by adopting various measures to induce regulatory self-defense pathways in response to different stresses in order to maintain their genetic potential to optimally grow and reproduce. To minimize cellular damage caused by such stresses, phytohormones provide a number of signaling networks involving developmental processes and plant responses to environmental stress. Phytohormones are potential tools for sustainable agriculture in the future. Significant advances have been made in identifying and understanding plant-hormone signaling, especially salicylic acid.

**Dejah Thoris and the Green Men of Mars Omnibus** Mark Rahner, 2019-10-09 The peace John Carter brought to Helium and Thark is new and fragile. On the eve of a Red & Green festival to balm age-old hatreds, Dejah Thoris is kidnapped. The ordeal triggers her lingering nightmares of abuse and helplessness at the hands of brutal Tharks. And the kidnapper is nightmare personified: Voro. He caters to a taste some green men never lost: the red meat of Helium women.

*Stone in Architecture* Erhard Winkler, 2013-03-14 The readers of the first two editions of *Stone: Properties, Durability in Man's Environment*, were mostly architects, restoration architects of buildings and monuments in natural stone, professionals who sought basic technical information for non-geologists. The increasing awareness of rapidly decaying monuments and their rescue from loss to future generations have urged this writer to update the 1973 and 1975 editions, now unavailable and out of print. Due to the 20-year-long interval, extensive updating was necessary to produce this new book. The present edition concentrates on the natural material stone, as building stone, dimension stone, architectural stone, and decorative field stones. Recently, the use of stone for thin curtain walls on buildings has become fashionable. The thin slabs

exposed to anew, unknown complexity of stresses, resulting in bowing of crystalline marble, has attracted much negative publicity. The costs of replacing white slabs of marble on entire buildings with its legal implications have led construction companies into bankruptcy. We blame many environmental problems on acid rain. Does acid rain really accelerate stone decay that much? Stone preservation is being attempted with an ever-increasing number of chemicals applied by as many specialists to save crumbling stone. Chemists filled this need during a time of temporary job scarcity, while the general geologist missed this opportunity; he was too deeply involved in the search for fossil fuels and metals.

**Achieving Business Competitiveness in a Digital Environment** Tereza Semerádová, Petr Weinlich, 2022-01-22 The COVID-19 pandemic has been a very strong reminder that the future economic development of any country is more than ever influenced by its ability to ramp-up digital competitiveness. Consequently, enterprises were pushed to assess and develop the possibilities offered by e-commerce and online marketing tools. In this book, experts outline the prerequisites for such online marketing competitiveness and compare the current level of digital marketing competitiveness in Europe by using publicly available macro and micro-level data. The authors present their analyses and recommendations including interviews with over 125 online marketers and e-commerce specialists and present the lessons from digitalization of over 600 SMEs.
