**Swipe to Unlock** Neel Mehta, Parth Detroja, Aditya Agashe, 2017 WANT A NON-CODING JOB AT A TECH COMPANY? Interested in product management, marketing, strategy, or business development? The tech industry is the place to be: nontechnical employees at tech companies outnumber their engineering counterparts almost 3 to 1 (Forbes, 2017). You might be worried that your lack of coding skills or tech industry knowledge will hold you back. But here's the secret: you don't need to learn how to code to break into the tech industry. Written by three former Microsoft PMs, Swipe to Unlock gives you a breakdown of the concepts you need to know to crush your interviews, like software development, big data, and

internet security. We'll explain how Google's ad targeting algorithm works, but Google probably won't ask you how to explain it in a non-technical interview. But they might ask you how you could increase ad revenue from a particular market segment. And if you know how Google's ad platform works, you'll be in a far stronger position to come up with good growth strategies. We'll show you how Robinhood, an app that lets you trade stocks without commission, makes money by earning interest on the unspent money that users keep in their accounts. No one will ask you to explain this. But if someone asks you to come up with a new monetization strategy for Venmo (which lets you send and receive money without fees), you could pull out the Robinhood anecdote to propose that Venmo earn interest off the money sitting in users' accounts. We'll talk about some business cases like why Microsoft acquired LinkedIn. Microsoft interviewers probably won't ask you about the motive of the purchase, but they might ask you for ideas to improve Microsoft Outlook. From our case study, you'll learn how the Microsoft and LinkedIn ecosystems could work together, which can help you craft creative, impactful answers. You could propose that Outlook use LinkedIn's social graph to give salespeople insights about clients before meeting them. Or you could suggest linking Outlook's organizational tree to LinkedIn to let HR managers analyze their company's hierarchy and figure out what kind of talent they need to add. (We'll further explore both ideas in the book.) Either way, you're sure to impress. Learn the must know concepts of tech from authors who have received job offers for Facebook's Rotational Product Manager, Google's Associate Product Marketing Manager, and Microsoft's Program Manager to get a competitive edge at your interviews!

**From Ultra Rays to Astroparticles** Brigitte Falkenburg, Wolfgang Rhode, 2012-12-30 The scope of the book is to give an overview of the history of astroparticle physics, starting with the discovery of cosmic rays (Victor Hess, 1912) and its background (X-ray, radioactivity). The book focusses on the ways in which physics changes in the course of this history. The following changes run parallel, overlap, and/or interact: - Discovery of effects like X-rays, radioactivity, cosmic rays, new particles but also progress through non-discoveries (monopoles) etc. - The change of the description of nature in physics, as consequence of new theoretical questions at the beginning of the 20th century, giving rise to quantum physics, relativity, etc. - The change of experimental methods, cooperations, disciplinary divisions. With regard to the latter change, a main topic of the book is to make the specific multi-disciplinary features of astroparticle physics clear.

The Real Meal Revolution Professor Tim Noakes, Jonno Proudfoot, Sally-Ann Creed, 2016-05-17 'Scientists labelled fat the enemy . . . they were wrong.' Time magazine We've been told for years that eating fat is bad for us, that it is a primary cause of high blood pressure, heart disease and obesity. The Real Meal Revolution debunks this lie and shows us the way back to restored health through eating what human beings are meant to eat. This book will radically transform your life by showing you clearly, and easily, how to take control of not just your weight, but your overall health, too - through what you eat. And

you can eat meat, seafood, eggs, cheese, butter, nuts . . . often the first things to be prohibited or severely restricted on most diets. This is Banting, or Low-Carb, High-Fat (LCHF) eating, for a new generation, solidly underpinned by years of scientific research and by now incontrovertible evidence. This extraordinary book, already a phenomenal bestseller, overturns the conventional dietary wisdom of recent decades that placed carbohydrates at the base of the supposedly healthy-eating pyramid and that has led directly to a worldwide epidemic of obesity and diabetes. Both a startling revelation, and as old as humanity itself, it offers a truly revolutionary approach to healthy eating that explodes the myth, among others, that cholesterol is bad for us. This is emphatically not just another unsustainable, quick-fix diet or a fad waiting to be forgotten, but a long-delayed return to the way human beings are supposed to eat.

*Unnoticed Art* Frans van Lent,2016-02 The book was published in 2014 by artist Frans van Lent, and will be distributed by Jap Sam Books from Spring 2015 on. The core of the book is the index and descriptions of 34 performance concepts carried out by volunteers at the Unnoticed Art Festival in May 2014. Connected to the concepts are the experiences and comments of the volunteers who have been executing the works. Within the framework of this festival we chose to document in the form of personal notes only. No photos or videos were taken, to avoid the special attention of passers-by. The last part of Unnoticed Art contains an essay, 'Three Positions', on the development of the video performances of Frans van Lent into the concept of unnoticed art.

Abigail's Exchange Kathryn Den Houter,2018-09-15 Abigail's Exchange is the inspiring story of a young lady who comes of age in the late 1800s in Baltimore, Maryland. Raised to own and manage a candy shop, which is left in her hands following tragedy, she struggles with her career and her wedding vows when she finds herself locked in the stranglehold of a difficult marriage. In Abigail's life, the reversals of fortune continually strike suddenly and unexpectedly, and at her lowest point, she watches her good intentions turn into unspeakable calamity. But, this is not the end of the story, for there is yet another reversal - a final, terrific tale of bravery, shrewdness, and unfaltering resilience. This story will resonate with women and men who are trying to navigate through real life with grace and honor.

Sand, Stars, Wind, & Water Tim Mulherin, 2021-05 In 2011, Good Morning America viewers voted Sleeping Bear Dunes National Lakeshore in northwest lower Michigan the Most Beautiful Place in America. Long before the park was ranked as a national favorite, author Tim Mulherin began exploring the region - including Leelanau and Grand Traverse counties and other points north - as a frequent visitor. Now, in Sand, Stars, Wind, & Water: Field Notes from Up North, Mulherin tells of his love of the area and its people, and in turn encourages visitors to respect and enjoy this national treasure. Mulherin joyfully shares his enduring, decades-long friendship with the region, born of hiking and cross-country skiing on woodland trails, dune climbing, trout fishing, sailing across Lake Michigan to camp on South Manitou and Garden islands, kayaking crystalline waters of local lakes and rivers, driving the scenic M-22 highway, and savoring downtime on Lake Michigan beaches. His essays are also a timely commentary on invasive species - both aquatic and human. Anyone who has visited this special place - or plans to - will find Mulherin's writing a thoughtful and amusing representation of what being Up North is really all about.
